

## TRAILS IN GLACIER NATIONAL PARK

Revised 1968

The following "Trails in Glacier National Park" which was revised in 1968 was given to Jake Bramante of Hike 734 by Don Scharfe from the basement of Rocky Mountain Outfitter in Kalispell, MT. This list contains 936.1 miles of trail based upon data from 1968. The discrepancy is due to trails being washed out by avalanches and floods or just cut due to funding and use. Others have just been moved. Either way, it's an enchanting walk down memory lane of a national park that keeps changing.
